

RENEGADE

DESIGN CONCEPTS

RENEGADE DESIGN CONCEPTS introduces the **CENTURION DOOR MACHINE**.

The **CENTURION** is a multi-function, mid-volume vertical door machine for the production of Pre-Hung Doors, Slab Doors and Hinge Jambs.

The **CENTURION** is ideal for producing residential and commercial doors requiring 2, 3, or 4 hinges and will accommodate 1-0 to 4-0 doors in width, and 6-8 to 9-0 in height. Multiple machining selections are simplified with a bi-lingual touch-screen control panel which allows the operator to quickly change door and hinge specifications.

The **CENTURION** can be utilized as a 'stand-alone' machine or can be paired with **RENEGADE DOOR LOADER** and/or the **RENEGADE PRE-HANGING ASSEMBLY STATION** to facilitate a higher volume production line. RENEGADE machinery is designed and built with rugged dependability and operator friendly features allowing for easy maintenance and rapid diagnostic evaluation. The machine features are based on proven designs with a history of tough reliability.
